

Symposium Title:

Global Diversity and Controversies in IgA Nephropathy: A Conversation with Experts

Symposium Summary:

The landscape of IgA nephropathy has evolved rapidly in recent years, with exciting prospects for the treatment of patients. But how much of this disease do we truly understand? Pathogenesis is still debated – significant geographic diversity exists in the epidemiology and disease progression along with potential differences in treatment response. Fundamental questions and controversies remain, and developing a better understanding will guide effective treatment strategies. Please join us as we assemble a panel of international experts led by Prof. Jon Barratt. Together, we will delve deeper and dissect IgA nephropathy, from its pathogenesis to potential treatments in 2023 and beyond.

Speakers:

- Prof. Jonathan Barratt PhD FRCP (Chair)
 - The Mayer Professor of Renal Medicine, Department of Cardiovascular Sciences, University of Leicester; Honorary Consultant Nephrologist, John Walls Renal Unit, Leicester General Hospital, UK
- Dr. Heather N. Reich MD CM, PhD, FRCPC
 - Oreopoulos-Baxter Division Director of Nephrology, University of Toronto; Gabor Zellerman Chair in Nephrology; Research Nephrologist, Clinician Scientist, University Health Network, Canada
- Dr. Hernán Trimarchi MD, PhD, FACP, FASN
 - Chief Nephrology Service and Kidney Transplant Unit, Hospital Británico de Buenos Aires; Professor of Medicine, Universidad Católica Argentina, Argentina
- Dr. Suceena Alexander MBBS, MD, DM (Nephrology), FRCP (Lon), FASN, PhD
 - Professor and HoU, Nephrology Unit III, Department of Nephrology, Christian Medical College, Vellore, Ranipet Campus; Addl. Vice Principal (Research), Christian Medical College, Vellore, India
